OBJECTIVE

Full-stack Software Engineer experienced in web and desktop development. Proficient in Angular, React, Next.js, Node.js, Python Flask, and .NET. Skilled in database design (SQL/NoSQL), RESTful APIs, authentication systems, and delivering tested, production-ready applications.

SKILLS

Languages:

JavaScript, TypeScript, PHP, C#, Python, C++, Dart

Relational Databases:

SQLServer, MySQL

NoSQL Databases:

MongoDB, Redis

Frameworks:

.NET, WPF, WinForms, ASP.NET(basic), Flask, ReactJS, NextJS, Angular, Flutter

Automation:

RPA using TagUI and Python

DevelopmentTools:

Git, Postman, SSMS, VS Code, Visual Studio, Mongo Compass, Figma, MySQL Workbench, Sqlite Studio

EDUCATION

Oct 2020 - Dec2024

Information Systems

University of Science-VNUHCM

Bachelor's Degree

WORK EXPERIENCE

AIPOWER

Feb 2025 - Present

Software Engineer

Employment Progression: Intern → Probation → Full-time (Feb 2025 – Present)

- Contributed to three internal projects across mobile and desktop platforms in an enterprise environment.
- **Project 1 (Flutter Mobile App):** Supported feature development by handling small tasks and UI adjustments during the initial project phase.

- **Project 2 (Automation Desktop Tool):** Developed automation workflows using Python RPA, implemented backend services with Flask, and built desktop UI components using WPF.
- **Project 3 (Desktop Application):** Developing and maintaining C# WPF modules and integrating business logic via Flask (Python) to support internal operations.
- **Current Project (Web Application):** Developing a Next.js and Supabase-based web application, integrating AI-driven features to streamline and enhance internal operations.
- Worked closely with team members in agile sprints, participated in code reviews, and ensured maintainable, readable code.

PROJECTS

One Million Reward Points

Apr 2023 - Jun 2023

Front-end Developer and Designer

Description: A web platform enabling users to redeem gifts using points from nationwide stores.
Technology: Next.js, Express.js, PostgreSQL, TypeScript
Responsibilities:

- Designed responsive UI using Figma, HTML, CSS, and Next.js.
- Collaborated with stakeholders to refine the user experience.
- Optimized performance, achieving 30% faster load times.

VTicket

Apr 2024 - Jul 2024

Front-end Developer and Designer

Description: An event ticketing platform allowing users to book tickets for nationwide events.
Technology: Python, JavaScript, React.js, Node.js, Django, PostgreSQL, MongoDB, Redis, Firebase
Responsibilities:

- Developed a scalable UI with React.js and integrated APIs.
- Built and tested wireframes using Figma.
- Enhanced real-time performance, reducing load time by 25%.

BlockHouse

Aug 2025 - Oct 2025

Full-stack Software Engineer

Description: A desktop app for salons to track revenue, analyze staff performance, and manage operations efficiently.
Technology: C#, WPF (MVVM), Python, Flask, SQLite
Responsibilities:

- Architected and built the entire system independently (frontend, backend, and database)
- Applied MVVM pattern to ensure clean, maintainable, and scalable UI architecture
- Designed a data-driven dashboard featuring top-performing employees and revenue analytics
- Developed core management modules for employees, services, and revenue tracking
