Binh Hoa Ward, Thuan An City, Binh Duong Province
https://vngson.github.io/

OBJECTIVE

Full-stack Software Engineer experienced in building scalable web, desktop, and backend applications. Skilled in React, Next.js, TypeScript, Python Flask, and .NET, with hands-on experience in micro-frontend architecture, RESTful APIs, and business management systems. Passionate about developing maintainable, production-ready software with modern engineering practices.

SKILLS

Languages:

JavaScript, TypeScript, Python, C#, PHP, C++, Dart, Move

Frontend:

ReactJS, Next.js, Angular, Tailwind CSS, Material UI (MUI), Zustand, React Query, Recharts

Backend:

Flask, SQLAlchemy, ASP.NET (basic), RESTful APIs, Supabase, Odoo

Desktop:

WPF (MVVM), WinForms, .NET

Blockchain & Web3:

SUI Blockchain, Smart Contracts, Web3 dApp Development

Databases:

SQL Server, MySQL, PostgreSQL, SQLite, MongoDB, Redis

Architecture & Concepts:

Micro-Frontend, Monorepo Architecture, Webpack 5 Module Federation, MVVM, Client-side Hashing, Web Workers

Automation:

RPA using TagUI and Python

Tools:

Git, Postman, VS Code, Visual Studio, SSMS, pgAdmin, SQLiteStudio, MySQL Workbench, Mongo Compass, Figma, Webpack

EDUCATION

Oct 2020 - Dec2024

Bachelor of Information Systems

University of Science-VNUHCM

Certifications: VSTEP B1 English (2023)

WORK EXPERIENCE

AIPOWER

Feb 2025 - Present

Software Engineer

Employment Progression: Intern → Probation → Full-time (Feb 2025 – Present)

- Contributed to three internal projects across mobile and desktop platforms in an enterprise environment.
- **Project 1 (Flutter Mobile App):** Supported feature development by handling small tasks and UI adjustments during the initial project phase.
- **Project 2 (Automation Desktop Tool):** Developed automation workflows using Python RPA, implemented backend services with Flask, and built desktop UI components using WPF.
- **Project 3 (Desktop Application):** Developing and maintaining C# WPF modules and integrating business logic via Flask (Python) to support internal operations.
- **Current Project (Web Application):** Developing a Next.js and Supabase-based web application, integrating AI-driven features to streamline and enhance internal operations.
- Worked closely with team members in agile sprints, participated in code reviews, and ensured maintainable, readable code.

PROJECTS

BlockHouse

Aug 2025 - Oct 2025

Full-stack Software Engineer

Description: A full-stack barber shop management platform across desktop, web, and backend systems, featuring a scalable micro-frontend architecture for business operations, employee management, and revenue analytics.

Technology: C#, WPF (MVVM), .NET 8, React 18, TypeScript, Webpack 5 Module Federation, Zustand, MUI v5, Recharts, Python, Flask, SQLAlchemy, SQLite.

Responsibilities:

- Architected and developed the full-stack platform across desktop, web, backend, and database layers
- Built a scalable micro-frontend web architecture using Webpack 5 Module Federation
- Developed RESTful APIs and business management modules for employees, services, and revenue tracking
- Designed analytics dashboards with revenue insights and employee performance visualization
- Applied MVVM architecture and modular design principles for maintainable and scalable systems

VTicket

Apr 2024 - Jul 2024

Front-end Developer and Designer

Description: An event ticketing platform allowing users to book tickets for nationwide events.

Technology: Python, JavaScript, React.js, Node.js, Django, PostgreSQL, MongoDB, Redis, Firebase

Responsibilities:

- Developed a scalable UI with React.js and integrated APIs.
- Built and tested wireframes using Figma.
- Enhanced real-time performance, reducing load time by 25%.
