

Vo Ngoc Son

Front-end developer

☎ 0375087078 ✉ sonvo1611@gmail.com 📍 Thuan An city, Binh Duong province

OBJECTIVE

Self-taught front-end developer with a portfolio of personal projects that demonstrate my skills in HTML, CSS, and JavaScript. Proficient in using popular front-end development frameworks and libraries, such as React, Nextjs and Angular. Motivated and eager to learn from experienced developers and contribute to a team environment.

EDUCATION

University of Science - VNUHCM 2020 - 2024

Information technology - Information system

GPA: 2.9/4.0 (Before the 1st semester of the fourth year)

CERTIFICATIONS

VSTEP B1 08/2023

SKILLS

HTML5	Expertise in the markup language used to create web pages.
CSS3	Expertise in the style sheet language used to control the appearance of web pages.
Javacript	Expert knowledge of programming languages used to create interactive websites with frameworks like reactjs, nextjs and angular.
Figma	Expertise in the popular design tool used to create user interfaces for web applications.

PROJECTS

OMRP
(04/2023 - 06/2023)

Name of customer	People who have accumulated reward points at the store.
Description project	This website helps customers use points accumulated at the store to make purchases here. These stores sign a contract with the company that owns the OMRP website, then specify the products customers can exchange and pay the company a fee at the end of the month. This not only helps customers avoid wasting accumulated points but also stimulates them to make purchase.
Your team size	6
Your position in project	Front-end developer and Design

Your responsibility in project	Design and develop user-friendly and visually appealing web interfaces using Figma, HTML, CSS, and JavaScript. Collaborate with stakeholders to define requirements, gather feedback, and iterate on designs. Implement accessibility best practices to ensure that web interfaces are accessible to users with disabilities. Test and debug web interfaces to ensure that they are working properly and meet all requirements. Deploy web interfaces to production environments and monitor their performance.
Technology description	HTML, CSS, Nextjs, Express js, Postgresql, Typescript.

Film Ticket

(08/2023 - 10/2023)

Name of customer	People who need to book movie tickets.
Description project	This website helps customers book movie tickets online. Cinemas contracted with Film Ticket, then provides information about the movies they can show. This helps customers to book tickets online without having to go to the theater to book.
